Teaching a subject as large, multi-disciplinary and complex as sustainability science is as difficult as it is important. To that end, we believe that sharing, commenting, and collaborating on teaching material and methods within the sustainability science

community will be a valuable resource for teachers and students. Several efforts to support such community building in teaching sustainable development are underway.

Tips for Teaching Sustainability. Beth Conklin, Vanderbilt University Professor of Anthropology, offers various suggestions for using ecological footprint calculators well and for teaching about sustainability issues generally: Beware of Student Overload. The rhetoric of urgent and global environmental crises can overwhelm students when they consider the immensity of the problems

humanity face and the difficulties involved in coping with them.
