Book Description.

"Avionics Training" is the first book to explain avionics in simple terms, with over 400 illustrations in full color. It assumes no knowledge of electronics, uses no math, formulas or confusing abbreviations. The book explains the operation of 30 systems, how they relate to each other, how they're installed and troubleshooting techniques.

Avionics Training: Systems, Installation, and ...

Avionics are the electronic systems used on aircraft, artificial satellites, and spacecraft. Avionic systems include communications,

navigation, the display and management of multiple systems, and the hundreds of systems that are fitted to aircraft to perform individual functions. These can be as simple as a searchlight for a police helicopter or as complicated as the tactical system for an airborne early warning platform. The term avionics is a portmanteau of the words aviation and electronics.
