Networking Design And Development - UKessays.com

Construct a prototype network or a Pilot site for testing of network Design . During the network designing and implementation when you finish a new module of network or deploy the design to small site, before the full implementation, it is a best practice to test the new solution. This testing can be done in one of two ways: prototype or pilot. A prototype network is a subset of the full design, tested in an isolated environment. The prototype does not connect to the existing network.
