Composite Materials Notes

A broad category of composite materials that include a honeycomb structure, a mass of hexagonal cells inspired by the shape of the honeycombs produced by bees in their nests. These are often used to produce flat, light materials with a high specific strength. Metal, ceramic and plastic honeycomb composites are used in aircraft and sporting goods.

Composite Materials Modern technologies demand materials with unusual and extraordinary combinations of properties that cannot be provided by conventional metal alloys, ceramic and polymeric materials required for aerospace, under water & transportation applications--Structural materials having low density, stiffness, high strength, abrasion resistance, impact resistance & corrosion resistance. Such combination of properties is difficult to achieve in conventional materials.
