"How did a 75-year old Star Trek actor become a social media juggernaut with nearly four million fans on Facebook? Why does everything he posts spread like wildfire across the ether, with tens to hundreds of thousands of likes and shares? And what can other sites, celebrities, brands and companies do to attain his stratospheric engagement levels, which hover near 100 percent while most languish in the single digits? In this candid, hilarious and informative book, Takei recounts his experiences on platforms such as Twitter, YouTube and Facebook, where fans and pundits alike have crowned him King. He muses about everything from the nature of viral sharing, to the taming of Internet trolls, to why Yoda, bacon and cats are such

popular memes. Takei isn't afraid to tell it likes he sees it, and to engage the reader just as he does his legions of fans. Both provokingly thoughtful and wickedly funny, *Oh Myyy!* captures and comments upon the quirky nature of our plugged-in culture. With Takei's conversational yet authoritative style, peppered with some of his favorite images from the web, readers should be prepared to LOL, even as they can't help but hear his words in their heads in that unmistakable, deep bass."--Back cover.

A Series of Papers on World Food Issues

Abstract: To provide information on world food issues and to consider these

issues as objectively as possible in nonthechnical language, a series of 16 papers are included. The first seven discuss natural resources (land, climate, water management, crop improvement and protection, the role of animals, and finally energy use) and their relation to food issues. The next seven examine the relationship between policy issues and human nutrition, focusing on nutrition, technology transfer, education and extension, land tenure, export versus domestic production, and international food aid. With rareexception, the moral and ethical questions relating to world food issues are not discussed. An extensive annotated bibliography is included.

Emotions and Temporalities *Cambridge University Press*

This Element brings together the history of emotions and temporalities, offering a

new perspective on both. Time was often imagined as a movement from the past to the future: the past is gone and the future not yet here. Only present-day subjects could establish relations to other times, recovering history as well as imagining and anticipating the future. In a movement paralleling the emphasis on the porous self, constituted by emotions situated not inside but between subjects, this Element argues for a porous present, which is open to the intervention of ghosts coming from the past and from the future. What needs investigating is the flow between times as much as the creation of boundaries between them, which first banishes the ghosts and then denies their existence. Emotions are the most important way through which subjects situate and

understand themselves in time.

Elementary Aspects of the Political

Histories from the Global South *Duke University Press*

In *Elementary Aspects of the Political* Prathama Banerjee moves beyond postcolonial and decolonial critiques of European political philosophy to rethink modern conceptions of "the political" from the perspective of the global South. Drawing on Indian and Bengali practices and philosophies from the late nineteenth and early twentieth centuries, Banerjee identifies four elements of the political: the self, action, the idea, and the people. She examines selfhood in light of precolonial Indic traditions of renunciation and *realpolitik*;

action in the constitutive tension between traditional conceptions of karma and modern ideas of labor; the idea of equality as it emerges in the dialectic between spirituality and economics; and people in the friction between the structure of the political party and the atmospherics of fiction and theater. Throughout, Banerjee reasserts the historical specificity of political thought and challenges modern assumptions about the universality, primacy, and self-evidence of the political. In formulating a new theory of the political, Banerjee gestures toward a globally salient political philosophy that displaces prevailing Western notions of the political masquerading as universal.

Advances in Hypersonics

Defining the Hypersonic Environment Volume 1 *Springer Science & Business Media*

These three volumes entitled *Advances in Hypersonics* contain the Proceedings of the Second and Third Joint US/Europe Short Course in Hypersonics which took place in Colorado Springs and Aachen. The Second Course was organized at the US Air Force Academy, USA in January 1989 and the Third Course at Aachen, Germany in October 1990. The main idea of these Courses was to present to chemists, computer scientists, engineers, experimentalists, mathematicians, and physicists state of the art lectures in scientific and technical disciplines including mathematical modeling, computational methods, and experimental

measurements necessary to define the aerothermodynamic environments for space vehicles such as the US Orbiter or the European Hermes flying at hypersonic speeds. The subjects can be grouped into the following areas: Physical environments, configuration requirements, propulsion systems (including airbreathing systems), experimental methods for external and internal flow, theoretical and numerical methods. Since hypersonic flight requires highly integrated systems, the Short Courses not only aimed to give in-depth analysis of hypersonic research and technology but also tried to broaden the view of attendees to give them the ability to understand the complex problem of hypersonic flight. Most of the participants in the Short Courses

prepared a document based on their presentation for reproduction in the three volumes. Some authors spent considerable time and energy going well beyond their oral presentation to provide a quality assessment of the state of the art in their area of expertise as of 1989 and 1991.

Terrorists or Freedom Fighters

Lantern Books

Foreword by Ward Churchill; cover design by Sue Coe The first anthology of writings on the history, ethics, politics and tactics of the Animal Liberation Front, Terrorists or Freedom Fighters? features both academic and activist perspectives and offers powerful insights

into this international organization and its position within the animal rights movement. Calling on sources as venerable as Thomas Aquinas and as current as the Patriot Act--and, in some cases, personal experience--the contributors explore the history of civil disobedience and sabotage, and examine the philosophical and cultural meanings of words like "terrorism," "democracy" and "freedom," in a book that ultimately challenges the values and assumptions that pervade our culture. Contributors include Robin Webb, Rod Coronado, Ingrid Newkirk, Paul Watson, Karen Davis, Bruce Friedrich, pattrice jones and others.

Multiregionalism and Multilateralism

Asian-European Relations in a Global Context *Amsterdam University Press*

The sovereign power of the nation-state has been steadily eroding for decades under the pressure of multilateral organizations such as the United Nations and multiregional organizations such as the European Union. The increasing prominence of non-governmental organizations such as Greenpeace and Human Rights Watch in times of crisis has also contributed, since the problems such groups address often extend beyond national borders and are thus difficult for national governments to manage alone. Multiregionalism and Multilateralism investigates these forces as they factor into political and economic relations between Asia and Europe.

Edexcel Linear *HarperCollins UK*

Healthcare Risk Adjustment and Predictive Modeling *ACTEX Publications*

This text is listed on the Course of Reading for SOA Fellowship study in the Group & Health specialty track. Healthcare Risk Adjustment and Predictive Modeling provides a comprehensive guide to healthcare actuaries and other professionals interested in healthcare data analytics, risk adjustment and predictive modeling. The book first introduces the topic with discussions of health risk, available data, clinical identification algorithms for diagnostic grouping and the use of grouper models. The second part of the book presents the concept of data

mining and some of the common approaches used by modelers. The third and final section covers a number of predictive modeling and risk adjustment case-studies, with examples from Medicaid, Medicare, disability, depression diagnosis and provider reimbursement, as well as the use of predictive modeling and risk adjustment outside the U.S. For readers who wish to experiment with their own models, the book also provides access to a test dataset.

Global Security, Safety, and Sustainability

6th International Conference, ICGS3 2010, Braga, Portugal, September 1-3, 2010. Proceedings *Springer*

Science & Business Media

The annual International Conference on Global Security, Safety and Sustainability (ICGS3) is an established platform in which security, safety and sustainability issues can be examined from several global perspectives through dialogue between academics, students, government representatives, chief executives, security professionals, and research scientists from the United Kingdom and from around the globe. The three-day conference focused on the challenges of complexity, rapid pace of change and risk/opportunity issues associated with modern products, systems, special events and infrastructures. The importance of adopting systematic and systemic approaches to the assurance of these

systems was emphasized within a special stream focused on strategic frameworks, architectures and human factors. The conference provided an opportunity for systems scientists, assurance researchers, owners, operators and maintainers of large, complex and advanced systems and infrastructures to update their knowledge on the state of best practice in these challenging domains while networking with the leading researchers and solution providers. ICGS3 2010 received paper submissions from more than 17 different countries in all continents. Only 31 papers were selected and were presented as full papers. The program also included a number of keynote lectures by leading researchers, security professionals and government

representatives.

Innovation in Aeronautics *Elsevier*

Innovation in aerospace design and engineering is essential to meet the many challenges facing this sector. Innovation in aeronautics explores both a range of innovative ideas and how the process of innovation itself can be effectively managed. After an introduction to innovation in aeronautics, part one reviews developments including biologically-inspired technologies, morphing aerodynamic concepts, jet engine design drivers, and developments underpinned by digital technologies. The environment and human factors in innovation are also explored as are trends in supersonic passenger air travel. Part two goes on to

examine change and the processes and management involved in innovative technology development. Challenges faced in aeronautical production are the focus of part three, which reviews topics such as intellectual property and patents, risk mitigation and the use of lean engineering. Finally, part four examines key issues in what makes for successful innovation in this sector. With its distinguished editors and international team of expert contributors, Innovation in aeronautics is an essential guide for all those involved in the design and engineering of aerospace structures and systems. Explores a range of innovative aerospace design ideas Discusses how the process of innovation itself can be effectively managed Reviews

Organizational Survival in the New World *Routledge*

In this book David and Alex Bennet propose a new model for organizations that enables them to react more quickly and fluidly to today's fast-changing, dynamic business environment: the Intelligent Complex Adaptive System (ICAS). ICAS is a new organic model of the firm based on recent research in complexity and neuroscience, and incorporating networking theory and knowledge management, and turns the living system metaphor into a reality for

organizations. This book synthesizes new thinking about organizational structure from the fields listed above into ICAS, a new systems model for the successful organization of the future designed to help leaders and managers of knowledge organizations succeed in a non-linear, complex, fast-changing and turbulent environment. Technology enables connectivity, and the ICAS model takes advantage of that connectivity by fostering the development of dynamic, effective and trusting relationships in a new organizational structure. This book outlines the model in chapter four, and then breaks down the model into its components in the next two chapters. This is a benefit to readers since different components of the model can be implemented at different times, so

the book can guide implementation of one or all of the components as a manager sees fit. There are eight characteristics of the ICAS: organizational intelligence, unity and shared purpose, optimum complexity, selectivity, knowledge centricity, flow, permeable boundaries, and multi-dimensionality.

Wage Earners in India 1500-1900

Regional Approaches in an International Context *SAGE Publishing*

India

The study of wage levels and the purchasing power of wages is often viewed as a specialized academic topic of little concern to the wider public. This is far from being the case, as this book demonstrates. The study of wages opens up vistas of the daily life of the working people, of their standards of living and, therefore, addresses questions of larger economic developments and unequal power relationships in a region. *Wage Earners in India 1500-1900: Regional Approaches in an International Context* brings together several scholars—young and veteran—to study new data and reinterpret older data from a fresh methodological perspective to locate India within global economic systems more effectively. This book • identifies

previously unused and unpublished material for the study of wages • underlines the importance of wages as a source of income for Indians from early times • demonstrates the trends in wages over the period under review • stresses the need to take women into account for the reconstruction of household income

Dying and Dead Seas Climatic Versus Anthropic Causes *Springer Science & Business Media*

There are incentive indications that the growth of human population, the increasing use and abuse of natural resources combined with climate changes (probably due to anthropic pollution, to some extent) exert a considerable stress on closed (or semi-

enclosed) seas and lakes. In many regions of the world, marine and lacustrine hydrosystems are (or have been) the object of severe or fatal alterations, from changes in regional hydrological regimes and/or modifications of the quantity or the quality of water resources associated with (natural or man-made) land reclamation, deterioration of geochemical balances (increased salinity, oxygen's depletion .. .), mutations of ecosystems (eutrophication, dramatic decrease in biological diversity ...) to geological disturbances and to the socio-economic perturbations which have been - or may be in the near future - the consequences of them. Seas and lakes are dying all over the world and some may be

regarded as already dead and there is an urgent need to try to understand how this is happening and identify the causes of the observed mutations, weighing the relative effects of climatic evolution and anthropic interferences. This book is the outcome of the NATO Advanced Research Workshop, held in Liege in May 2003. The Workshop was organized at the University of Liege as a follow on meeting to the 35 International Liege Colloquium on Ocean Dynamics, dedicated in 2003 to Dying and Dead Seas. The book contains the synthesis of the lectures given by 16 main speakers during the ARW.

Reframing Singapore

Memory, Identity, Trans-regionalism *Amsterdam University Press*

Over the past two decades, Singapore has advanced rapidly towards becoming a both a global city-state and a key nodal point in the international economic sphere. These developments have caused us to reassess how we understand this changing nation, including its history, population, and geography, as well as its transregional and transnational experiences with the external world. This collection spans

several disciplines in the humanities and social sciences and draws on various theoretical approaches and methodologies in order to produce a more refined understanding of Singapore and to reconceptualize the challenges faced by the country and its peoples.

The Garden of Burning Sand *Quercus*

The New York Times bestselling author John Hart raved that "If you like stories of good people struggling to do right in the world's forgotten places, there is no one better suited than Corban Addison to take you on the ride of your life." In *The Garden of Burning Sand*, Addison, the bestselling author of *A Walk Across the Sun*, creates a powerful and poignant novel that takes the reader from the red light areas of Lusaka, Zambia, to the

gilded chambers of the Washington, D.C. elite, to the splendor of Victoria Falls and Cape Town. Zoe Fleming, an accomplished young human rights attorney, has made a life for herself in Zambia, far from her estranged father--an American business mogul with presidential aspirations--and from the devastating betrayals of her past. When a young girl with Down syndrome is sexually assaulted in a Lusaka slum, Zoe joins Zambian police officer Joseph Kabuta in investigating the rape. Piecing together clues from the victim's past, they discover an unsettling connection between the girl--Kuyeya--and a powerful Zambian family who will stop at nothing to bury the truth. As they are drawn deeper into the complex web of characters behind this appalling crime,

Zoe and Joseph forge a bond of trust and friendship that slowly transforms into love. Opposed on all sides, they find themselves caught in a dangerous clash between the forces of justice and power. To successfully prosecute Kuyeya's attacker and build a future with Joseph, Zoe must risk her life and her heart--and confront the dark past she thought she had left behind.

Low-Speed Wind Tunnel Testing *John Wiley & Sons*

A brand-new edition of the classic guide on low-speed wind tunnel testing While great advances in theoretical and computational methods have been made in recent years, low-speed wind tunnel testing remains essential for obtaining the full range of data needed to guide

detailed design decisions for many practical engineering problems. This long-awaited Third Edition of William H. Rae, Jr.'s landmark reference brings together essential information on all aspects of low-speed wind tunnel design, analysis, testing, and instrumentation in one easy-to-use resource. Written by authors who are among the most respected wind tunnel engineers in the world, this edition has been updated to address current topics and applications, and includes coverage of digital electronics, new instrumentation, video and photographic methods, pressure-sensitive paint, and liquid crystal-based measurement methods. The book is organized for quick access to topics of interest, and examines basic test techniques and objectives of modeling

and testing aircraft designs in low-speed wind tunnels, as well as applications to fluid motion analysis, automobiles, marine vessels, buildings, bridges, and other structures subject to wind loading. Supplemented with real-world examples throughout, *Low-Speed Wind Tunnel Testing, Third Edition* is an indispensable resource for aerospace engineering students and professionals, engineers and researchers in the automotive industries, wind tunnel designers, architects, and others who need to get the most from low-speed wind tunnel technology and experiments in their work.

Knowledge Management in Theory and Practice, third edition *MIT Press*

A new, thoroughly updated edition of a

comprehensive overview of knowledge management (KM), covering theoretical foundations, the KM process, tools, and professions. The ability to manage knowledge has become increasingly important in today's knowledge economy. Knowledge is considered a valuable commodity, embedded in products and in the tacit knowledge of highly mobile individual employees. Knowledge management (KM) represents a deliberate and systematic approach to cultivating and sharing an organization's knowledge base. This textbook and professional reference offers a comprehensive overview of the field. Drawing on ideas, tools, and techniques from such disciplines as sociology, cognitive science, organizational behavior, and information

science, it describes KM theory and practice at the individual, community, and organizational levels. Chapters cover such topics as tacit and explicit knowledge, theoretical modeling of KM, the KM cycle from knowledge capture to knowledge use, KM tools, KM assessment, and KM professionals. This third edition has been completely revised and updated to reflect advances in the dynamic and emerging field of KM. The specific changes include extended treatment of tacit knowledge; integration of such newer technologies as social media, visualization, mobile technologies, and crowdsourcing; a new chapter on knowledge continuity, with key criteria for identifying knowledge at risk; material on how to identify, document, validate, share, and

implement lessons learned and best practices; the addition of new categories of KM jobs; and a new emphasis on the role of KM in innovation. Supplementary materials for instructors are available online.

The Newbery Medal and Coretta Scott King Award-winning classic about a boy who decides to hit the road to find his father—from Christopher Paul Curtis, author of *The Watsons Go To Birmingham*—1963, a Newbery and Coretta Scott King Honoree. It's 1936, in Flint Michigan. Times may be hard, and ten-year-old Bud may be a motherless boy on the run, but Bud's got a few things going for him: 1. He has his own

suitcase full of special things. 2. He's the author of *Bud Caldwell's Rules and Things for Having a Funner Life and Making a Better Liar Out of Yourself*. 3. His momma never told him who his father was, but she left a clue: flyers advertising Herman E. Calloway and his famous band, the Dusky Devastators of the Depression!!!!!! Bud's got an idea that those flyers will lead him to his father. Once he decides to hit the road to find this mystery man, nothing can stop him—not hunger, not fear, not vampires, not even Herman E. Calloway himself.
