The myths about this least understood area of CB radio will be exposed at last. My personal experience in repairing over 2,000 CB radios has shown that about 75% of all problems are not even in the radio; they’re almost always caused by bad mikes and bad antennas. Of the remaining 25%, perhaps 20% of all internal problems are the result of reversing the power leads, bad audio and transmitter "Finals," bad crystals, and bad solder connections.
