SearchEngines - Information Retrieval

Information retrieval is the activity of obtaining information system resources that are relevant to an information need from a collection of those resources. Searches can be based on full-text or other content-based indexing. Information retrieval is the science of searching for information in a document, searching for documents themselves, and also searching for the metadata that describes data, and for databases of texts, images or sounds. Automated information retrieval systems are used to r

Information retrieval - Wikipedia

Activity – Information Retrieval in Web search: Try to search for the queries below and notice the differences in search engine results : blogs on analytics; blogs analytics; blogs on analytic; books on analytics; blogs on big data . Inference: You will notice that the first 3 searches gave similar results while 4th and the 5th search result displayed a different result. This is expected because what we are asking in the first 3 queries is quite similar.
