One triangle can be rotated, but as long as they are the same shape, the triangles are still similar. In the figure below, the triangle PQR is similar to P'Q'R' even though the latter is rotated clockwise 90°. In this particular example, the triangles are the same size, so they are also congruent. Reflection One triangle can be a mirror image of the other, but as long as they are the same shape, the triangles are still similar.
