Solving Rational Equations And Inequalities

Rational equations and inequalities. To solve equations involving rational expressions, we have the freedom to clear out fractions before proceeding. After multiplying both sides by the common denominator, we are left with a polynomial equation. Solve the equation. The common denominator is .

Rational equations and inequalities - Ximera

Often, when solving equations involving rational expressions, it helps to eliminate fractions by multiplying both sides of the equation by the denominators of each

term involved. In the context of this problem, we can first multiply both sides of the equation by $x+2$ to eliminate the denominator of the first term.

Solving Rational Equations and Inequalities - High School Math

To solve an inequality involving rational functions, we set our numerator and denominator to 0 and solve them separately. This will give us numbers that divide our function into intervals.

Solving Equations & Inequalities Involving Rational ...

Solving Rational Inequalities. The key approach in solving rational inequalities relies on finding the critical values of the rational expression which divide the number line into distinct open intervals. The critical values are simply the zeros of both the numerator and the denominator. You must remember that the zeros of the denominator make the rational expression undefined, so they must be immediately disregarded or excluded as a possible solution.

The solution set of the inequality is given by the union of all intervals where rational expression on the left side of the given inequality is negative. Hence the solution set for the above inequality, in interval notation, is given by: $(-\infty, -3) \cup (-1, 3)$

Solve Rational Inequalities - Examples With Solutions

When you multiply both sides of an equation by a negative number you have to swap the inequality. So this greater than sign will become a less than sign because we're assuming that the x plus 2 is negative. These cancel out. 0 times anything is 0. We get that x minus 1 is less than 0. Solving for x , adding 1 to both sides, x is less than 1.
