Many of the acids that we do not consume in the household are used in the laboratories and industries, which include an acid such as HCl, H_2SO_4 etc. and bases such as NaOH, KOH etc. When these acids and bases are mixed in the right proportions, the neutralization reaction thus results in the formation of salt and water. Some

naturally occurring salts found in nature include NaCl and KCl etc in seawater and natural rock deposits. In this section, we will read more about acid, base and salt ...
