Over the last several articles, we have been exploring how developers can interface to sensors and develop

reusable drivers. In "Interfacing with modern sensors: Interface design", we looked at how we could design sensor interfaces using C. In this article, we are going to look at creating sensor interface from a more object-oriented standpoint using C++.

Interfacing with modern sensors: Interface design using C++

Book Description. This book is for people who are interested in learning and exploring electronic interfacing as well as C++ programming in a practicable and enjoyable way. Readers will learn to program a PC to do real-world things – not simply number crunching and graphics. They will also master how to write programs that interact with real-world devices through the use of a specially-developed interface circuit board included with the book.
