Esmolol 1 is a relatively cardioselective β -adrenoceptor antagonist. Since esmolol is rapidly metabolised by blood-borne esterases, it has a very short half-life (about 9 mins) and a short duration of action. In this respect esmolol is unique amongst currently available β -adrenoceptor antagonists, and it is anticipated that it will be particularly useful in critical care situations where administration by continuous intravenous infusion should permit a level of control over β ...
