Novel Glucose Sensing Technology And

Interpretation: Novel flash glucose testing reduced the time adults with well controlled type 1 diabetes spent in hypoglycaemia. Future studies are needed to assess the effectiveness of this technology in patients with less well controlled diabetes and in younger age groups. Funding: Abbott Diabetes Care.

Novel glucose-sensing technology and hypoglycaemia in type ...

In summary, use of the novel flash glucose sensor system resulted in a significant reduction in time and incidence of hypoglycaemia, without deterioration in HbA 1c levels, demonstrating that the system is a safe replacement for self-monitoring of blood glucose and is highly acceptable to individuals with type 1 diabetes. For many individuals, hypoglycaemia is a barrier to optimum glucose control.
