This advanced chemistry text has been updated to match the specification for A Level Chemistry from September 2000. The problems have been revised and graded to allow more differentiation, helping the teacher to teach students of a wide range of abilities. The new editions of all the texts in this series should make it easier for teachers to match their teaching to the new modular specification. There are new activities to cover ICT and key skills, and end-of-unit tests to give students practice.

Guidance Manual for Disposal of Chlorinated Water *American Water Works Association***Journal of the Chemical Society, 1900, Vol. 78****Abstracts of Papers on Organic Chemistry; Part I (Classic Reprint)** *Forgotten Books*

Excerpt from Journal of the Chemical Society, 1900, Vol. 78: Abstracts of Papers on Organic Chemistry; Part I The chromic acid contained in the solution used for purifying acetylene is estimated as follows. 25 grams are boiled with 100 of a 5 per cent. Sodium hydroxide solution, the cooled liquid made up to a litre, and 50 then treated with 8 of a 10 per cent. Solution of potassium iodide, together with about 18 cc. Of a 20 per cent. Solution of hydrochloric acid, 200 of water, and a slight excess of sodium thiosulphate solution. The excess of thiosulphate is titrated with iodine solution. The results obtained show that pure acetylene is not attacked by the chromic acid solution and that the amount of solution required for purifying the gas is dependent on the quantity of gas to be treated and amount of

impurity it contains. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Classic Chemistry Demonstrations

Royal Society of Chemistry

Classic Chemistry Demonstrations is an essential, much-used resource book for all chemistry teachers. It is a collection of chemistry experiments, many well-known others less so, for demonstration in front of a class of students from school to undergraduate age. Chemical demonstrations fulfil a number of important functions in the teaching process where practical class work is not possible. Demonstrations are often spectacular and therefore stimulating and motivating, they allow the students to see an experiment which they otherwise would not be able to share, and they allow the students to see a skilled practitioner at work. Classic Chemistry Demonstrations has been written by a teacher with several years' experience. It includes many well-known experiments, because these will be useful to new chemistry teachers or to scientists from other disciplines who are teaching some chemistry. They have all been trialled in schools and colleges, and the vast majority of the experiments can be carried out at normal room temperature and with easily accessible equipment. The book will prove its worth again and again as a regular source of reference for planning lessons.

Water Pollution & Treatment (Sugar Industries) *BlueRose Publishers*

The problem of Water Pollution and scarcity of clean water is increasing day by day in India, which is due to so many reasons like fast and unplanned urbanization, non availability of treatment

technologies as well as lack of attention and skill in the field of pollution and pollution control systems. Keeping the environment clean and safe is not a duty of any individual but it is the duty of all. Environment can be kept safe with the joint efforts of all who are living on the earth and every human has to contribute in this with their capacity either by their act for the prevention or by their skill for the corrective actions. Since I am in the field of Effluent Treatment and worked with so many treatment systems, therefore, I felt it as my duty to share my knowledge among the Environment Technical and to inspire the professionals of Sugar Industries to put attention towards the treatment of the effluent and water conservation. I am thankful to my colleague Mr. Manoj Kr. Mishra who has helped a lot in compilation of the relevant matters in this Book. I am also thankful to our colleague Ms. Lucky Jain who has helped in typing of this Book. This book is being written in keeping view of the Effluent Treatment of cane based Sugar Industries this book comprises with the technologies available for the treatment of the cane sugar Manufacturing Industries. Besides this book also covers the way of selection of suitable technologies and the procedure for their operation and maintenance with the procedures how to measure the performance of the Effluent treatment system. We have tried to precise the material of the Book. Only essential, relevant and compulsory contents are taken care. I hope this Book will be helpful not only to the professionals who are working in Effluent Treatment and Environment but others who are working with the other department like Production and Engineering will also get benefited with this Book.
