The Applied Research Center (ARC) is a racial justice think tank and home for media and activism. ARC is built on rigorous research and creative use of new technology. Our goal is to popularize the need for racial justice and prepare people to fight for it.

About the Applied Research Center • Racial Equity Tools

The US Army Engineer Research and Development Center conducted a three-year, applied research program entitled Automated Construction of Expeditionary Structures to develop an adaptable capability to “print” custom-designed expeditionary structures on demand in the field using locally available materials with the minimum number of personnel. This work investigated large-scale, automated “additive construction” (i.e., 3D printing with concrete) for construction applications.

According to the standard definition of applied research, It is a form of systematic research that involves the pragmatic application related to science. Applied research utilizes a major part of theories that are presented by research communities. Methods of knowledge and techniques are also used in applied research.

Applied Research: Definition and Examples

Applied research “aims at finding a solution for an immediate problem facing a society, or an industrial/business organisation, whereas fundamental research is mainly concerned with generalisations and with the formulation of a theory”. Applied research is considered to be non-systematic inquiry and it is usually launched by a company, agency or an individual in order to address a specific problem.
