Psychology Health Care Canadian Perspective

Psychology of Health and Health Care focuses on understanding how biological (e.g., heredity, physiological systems), psychological (e.g., emotions, cognitions, beliefs, personality) and social (e.g., family, community) factors interact to affect health and disease. The main goals of the course are to develop a thorough understanding of the biopsychosocial approach to health, to gain knowledge of the different theories, research, and clinical interventions that relate to health psychology ...

The Psychology of Health and Health Care: A Canadian ...

The fifth edition of The Psychology of Health and Health Care: A Canadian Perspective is organized into major parts and chapters. The division of topics into major parts is a new addition to the book. This fifth edition includes new features that highlight the key concepts for each chapter. We have rethought the structure of our “advance organizers” that help students start thinking about a chapter before delving into it.
