Practical Object-Oriented Design Course. I teach an extremely practical object-oriented design (POOD) course. The primary goal of this virtual course is to teach you to think in objects and its basic method is to let you learn to do so by writing code. You’ll learn to leverage the 'principles' of OOD to minimize the costs of creating new software and mitigate the pain of maintaining existing code.

It explains object-oriented design (OOD) using realistic, understandable examples. POODR is a practical, readable introduction to how OOD can lower your costs and improve your applications. POODR will help you: Decide what belongs in a single class. Avoid entangling objects that should be kept separate. Define flexible interfaces among objects. Reduce programming overhead costs with duck typing. Successfully apply inheritance. Build objects via composition. Design cost-effective tests
