Introduction to Visual Basic Programming

Concepts are an extension to the templates feature provided by the C++ programming language. Concepts are named Boolean predicates on template parameters, evaluated at compile time. A concept may be associated with a template, in which case it serves as a constraint: it limits the set of arguments that are accepted as template parameters. Originally dating back to suggestions for C++11, the original concepts specification has been revised multiple times before now formally being a required part

Concepts (C++) - Wikipedia

The intent of concepts is to model semantic categories (Number, Range,

RegularFunction) rather than syntactic restrictions (HasPlus, Array). According to ISO C++ core guideline T.20, "The ability to specify a meaningful semantics is a defining characteristic of a true concept, as opposed to a syntactic constraint."
