Undergraduates who attend college or university and major in a scientific subject will typically be awarded a BSc degree, while MSc qualifications are reserved for those who complete additional postgraduate study. An MSc is a higher level of qualification and is often used as a stepping stone toward the acquisition of a doctorate.

Difference Between a BSc & MSc | The Classroom

The PhD with integrated MSc combines a one-year specialised taught MSc programme in Molecular Medicine with a three-year individual research PhD. Off We recommend this option for applicants who are specifically seeking a four-year PhD programme and/or those wishing to enhance their specialist knowledge and skills before commencing their research.
