Competency-Based Teacher Education for English as a Foreign Language

Theory, Research, and Practice *Routledge*

Providing a series of chapters, written by teacher educators in

three continents, this edited volume explores the concepts, challenges, possibilities, and implementations of competency-based instruction for developing English competencies in English as a foreign language (EFL) contexts. Recent trends in education have emphasized the need to develop competencies that connect learning with real-life performances. This need has brought about a massive increase in the number of studies and scholarly works devoted to research into competency-based education. However, for teachers and learners of EFL, it is challenging to develop competencies for using a language that does not seem to connect with their real-life scenarios. The chapters apply the concept of competency-based instruction in different EFL contexts and are structured around three themes: Theory: current thoughts on theories of competency-based education Research: empirical research on competency-based teacher education Practice: integrating competency-based instruction into teacher education This book offers examples of competency-based EFL teacher education through both research and practical applications. In addition to the innovation in competency approaches, the inclusion of language learning in virtual environments offers a valuable resource for scholars, educators, researchers, and all those concerned with current and future education.

Teaching of Culture in English as an International Language

An Integrated Model *Routledge*

The importance of integrating the teaching and learning of language and culture has been widely recognised and emphasized. However, how to teach English as an International Language (EIL) and cultures in an integrative way in non-native

English speaking countries remains problematic and has largely failed to enable language learners to meet local and global communication demands. Developing students' intercultural competence is one of the key missions of teaching cultures. This book examines a range of well-established models and paradigms from both English-speaking and non-English speaking countries. Exploring questions of why, what, and how to best teach cultures, the authors propose an integrated model to suit non-native English contexts in the Asia Pacific. The chapters deal with other critical issues such as the relationship between language and power, the importance of power relations in communication, the relationship between teaching cultures and national interests, and balancing tradition and change in the era of globalisation. The book will be valuable to academics and students of foreign language education, particularly those teaching English as an international language in non-native English countries.

Glocalising Teaching English as an International Language

New Perspectives for Teaching and Teacher Education in Germany *Routledge*

The worldwide spread, diversification, and globalization of the English language in the course of the 20th and early 21st centuries has significant implications for English Language Teaching and teacher education. We are currently witnessing a paradigm shift towards Teaching English as an International Language (TEIL) that aims to promote multilingualism and awareness of the diversity of Englishes, increase exposure to this diversity, embrace multiculturalism, and foster cross-cultural awareness. Numerous initiatives that embrace TEIL can be observed around the world, but ELT and teacher education in Germany (and other European countries) appear to be largely unaffected by this development, with standard British and American English and the monolingual native speaker (including the corresponding cultural norms) still being very much at the center of attention. The present volume addresses this gap and is the first of its kind to showcase recent initiatives that aim at introducing TEIL into ELT and teacher education in Germany, but which have applicability and impact for other countries with comparable education systems and 'traditional' ELT practices in the Expanding Circle. The chapters in this book provide a balanced mix of conceptual, empirical, and practical studies and offer the perspectives of the many stakeholders involved in various settings of English language education whose voices have not often been heard, i.e., students, university lecturers, trainee teachers, teacher educators, and in-service teachers. It therefore adds significantly to the limited amount of previous work on TEIL in Germany and bridges the gap between theory and practice

that will not only be relevant for researchers, educators, and practitioners in English language education in Germany but other educational settings that are still unaffected by the shift towards TEIL.
