Analysis Of The Cognitive Interview

The Cognitive Interview is a questioning technique used by the police to enhance retrieval of information about a crime scene from the eyewitnesses and victims memory. Because our memories are made up of a network of associations rather than discrete and unconnected events, there are a

number of ways that these memories can be accessed.

Analysis of the Cognitive Interview in Questionnaire Design

At the start of a cognitive interview, the interviewer attempts to help the witness feel relaxed, and seeks to tailor their language to suit the individual. The witness is then encouraged to recreate their internal and external conditions at the scene (e.g. the mood they were in, their thoughts, the weather, etc.), recalling the event backwards and forwards in time, and recalling it from other people's perspectives.
