In reality the "new" for
1996 440 twin is a

born-again Rotax, having appeared years and years ago in Blizzard-chassied Ski-Doo models. Being larger in displacement, it should provide better bottom end for the Touring LE, especially when being worked as a two-up touring mount. Midrange should be better and we know the top end is noticeably improved.

Prevents someone with another ski doo DESS lanyard from driving away with your machine. You wouldn't happen to have the wiring schematic for the air compressor to the machine would you. I have shop manual for the 98 grand touring SE but no schematic or wiring diagram that shows how the wiring is connected from the compressor assy to the machine.
