Chemical Equilibria in Soils by Willard L. Lindsay

This chapter describes a model for
chemical equilibria in soils and solutions
(the CHESS model) that can be used to
assess reaction formulation in
environmental chemistry research. The
approach used in the CHESS model is
similar to models such as MINEQL that

are based on the tableau notation for describing chemical systems.

The CHESS Model for Calculating Chemical Equilibria in ...

Emphasis is placed on minerals and solid phases in soils that dissolve and precipitate, and in doing so, control the composition of the soil solution. This is the only comprehensive treatment of chemical equilibria in the soil environment that is available. Other texts deal well with the kinetics of reactions in soils but touch lightly on the equilibrium concepts.
