However, biological systems are also subjected to an ever-present influence: the electromagnetic (EM) environment. Biological systems have the potential to be influenced by subtle energies which are exchanged at atomic and subatomic scales as EM phenomena. These energy exchanges have the potential to manifest at higher orders of discourse and affect the output (behavior) of a biological system.

Electromagnetic Fields in Biological Systems - Lin, James ...

The effects of EMFs exposure on the biological systems and human body, due to its potential health hazards, have become the focus of interest since many years ago. The aim of this review is to investigate the biological effects of non-ionizing electromagnetic fields (EMFs) on human body and biological systems on the basis of recent findings. In the recent years, application of electrical devices as an artificial source of EMFs has drastically increased the amount of human exposure in daily life.
