Welcome to the World of Hidden 3D Stereograms. A stereogram is a 2D image that creates a visual illusion of a 3D scene. In order to see the hidden 3D shapes in these images, a special viewing technique is required. If you do not know how use this technique, learn from these instructions:

Hidden 3D - Stereogram Images, Games, Video and Software ...

Hidden Image
Stereograms are defined by being

virtually impossible to see as 2D, with objects being magically exposed in 3D only when viewed correctly. This is the type image most commonly associated with stereograms. It is difficult to show anything with fine detail or long words, so it is necessary to keep objects simple and text short. As with most of my stereograms, these images are a ...

Color Stereo Hidden Image Stereogram Gallery

Start moving the stereogram up slowly, but keep looking at the distance where the target object is, and the hidden 3D object should appear at the same distance. 4. Keep looking this way until your focus adjusts and the blurry object

becomes sharp and recognizable. * If it doesn't work right away try distance to the target object.

How to View 3D Stereograms - HIDDEN 3D

Stereograms A stereogram is a picture within a picture. Hidden inside each image is an object which appears in 3D when viewed correctly. BrainBashers™ is a trademark.

BrainBashers - Stereograms

These colourful pictures, known as autostereograms, produced a 3D image when the viewer arranged their eyes in a certain way while looking at the 2D pattern. A shark is hidden in the picture HOW...

Researchers reveal how the Magic Eye puzzle illusions work ...

An autostereogram is a single-image stereogram (SIS), designed to create the visual illusion of a three- dimensional (3D) scene from a two- dimensional image. In order to perceive 3D shapes in these autostereograms, one must overcome the normally automatic coordination between accommodation (focus) and horizontal vergence (angle of one's eyes).

The main problem
came when figuring
out the depth of the
hidden image, so it
works for most images
although there are

some which it can't
figure out. You can
input an image (local
file or url) and it will
load it and process the
image to give you what
it thinks is the hidden
image. Give it a go!
There are some test
images you can choose
from.
