Mechanical Properties Of 5083 Aluminum

Aluminium 5083 is known for exceptional performance in extreme environments. 5083 is highly resistant to attack by both seawater and industrial chemical environments. The properties, applications and fabrication details are provided for aluminium alloy 5083.

Aluminium 5083: Properties, Fabrication and Applications

Aluminum 5083 is a non-heat treatable alloy known for its resistance to extreme environments, including seawater corrosion and industrial chemicals. While featuring limited machinability due to its exceptional strength, AL 5083 is the material of choice for marine and aquatic applications and is typically used in shipbuilding. Other uses for this alloy include transportation applications such as rail, truck, and vehicle bodies, as well as pressure vessels and food processors.
