Original Strength *Xulon Press*

When you were a child, you had an amazingly strong, resilient and healthy body. The body you built through movement during the first several years of your life was meant to be the foundation from which you would continue to add strength, power and resiliency. Your body was meant to be strong, graceful, powerful, fluid, mobile and resilient. You were never meant to be broken, weak, fragile, stiff or injured. You were never meant to just "fall apart" with age. You are supposed to be able to conquer mountains, and even playgrounds, well into your golden years. You are supposed to enjoy this life with vitality. But, many of us do not. Many of us are just watching life go by. We have lost our way. We have lost our foundation. Our sedentary lifestyles have robbed us of the foundation and the joy of movement that we built as children. Because of this, we have lost our strength, our health, our resiliency and our vitality. Thankfully, we were indeed made to move. Through movement, specific movements, we can regain our foundation of strength, our foundation of health. We can become the strong, powerful, and graceful bodies that we were meant to be. We can enjoy this life with vitality. We don't have to be spectators, merely existing. We were made for adventure, for life! We can regain our Original Strength - our foundation. We can help our bodies remember how to move again and in doing so, we can become strong, healthy and resilient; like we were meant to be. We invite you to join us and regain the body you were always meant to have: A body capable of enjoying life.

A Fundamental Guide to Training for Strength and Power

Can You Go?

Assessments and Program Design for the Active Athlete and Everybody Else

Training people in sport as a coach or in fitness as a personal trainer is certainly rewarding work. But, there's a problem: What do we do next? There are countless books on diet and exercise, hundreds of machines, devices and gimmicks to train people, and new gadgets and gizmos are popping up daily. "Can You Go?" answers this question: What do we NEED to do next? Appropriate assessment leads to the appropriate answer. If it there's a mobility issue, focus on mobility work. The same is true for body composition and strength; focus on what we need to do, not what we want to do. For the performance athlete, sometimes assessment can be the short, brutal and harsh question, "Can you go?" Lessons from this frankness can be learned by both the coach and trainer. The ill and the elite share the same basic body, and the job is to enhance performance and quality of life in every training situation.

Physiology of Strength *Pickle Partners Publishing*

First published in 1961, "[T]his book is the result of ten years of research and experiment in the problems of muscle strength and muscle training at the Max-Planck-Institut für Arbeitsphysiologie, Dortmund, Germany supplemented by further work at the Lankenau Hospital, Division of Research, Philadelphia, Pennsylvania. There is provided the present status of these problems, and there is demonstrated how muscle strength may be built and maintained with a minimum of time and effort. "The methods used are adaptable, with suitable modification, to children, to average young people, to athletes in training, to sedentary workers and older persons who wish to maintain bodily strength, and to those who have undergone surgery and need rehabilitation of the muscle structure—in short, to anyone who wishes to develop and maintain good muscle tone. "A strong and well-built body not only has pleasing appearance, it permits the undertaking of arduous physical activities or active sports without undue fatigue, and with real enjoyment. "It is the author's hope that in this age of fast living and nervous tension, when there often seems neither time nor place for extensive exercise, this book will assist those who wish to maintain bodily strength and fitness—simply, at home, without elaborate equipment—on a do-it-yourself basis. It should prove of special benefit to teachers of physical education and rehabilitation."—THEODOR HETTINGER, M.D.

Tactical Barbell

Definitive Strength Training for the Operational Athlete *Createspace Independent Publishing Platform*

Operational athletes are a unique breed. You need to physically perform at an extraordinarily high level in stressful situations. Often in dangerous or unstable environments. As a SWAT operator, combat-arms soldier, or first responder, you have to be a Jack of All Trades. Let's take that a step further. You have to achieve some degree of mastery. You have to be strong, have incredible levels of endurance, and be capable of sustained bursts of intense activity. All while tired, hungry, cold, or worse. You can't train like a bodybuilder. You can't be sore for a week after 'leg' day. You can't afford to specialize like a powerlifter. You have other abilities you need to develop, things like cardiovascular training, work capacity, and occupational skills. Anyone that's operational knows it's a constant juggling act trying to become (and stay) superhuman. Tactical Barbell is a strength training program designed specifically for operational athletes using correct principles and best practices. The objective being to increase maximal-strength and strength-endurance, while taking into account the need to simultaneously train other fitness domains. Periodization based, with a simple progression model that allows for a great degree of customization. You won't find cables, balance boards or medicine balls in this program. What you will get is a reliable, repeatable, cutting edge system to increase your strength dramatically. In a manner that leaves you time and energy to train all those other things you need to be good at. No fluff. No frills. If you live in the arena, you know talk is cheap. The program includes a built in strength testing component. You will know whether or not your strength has increased, and by how much. Simple.
