The resonant LLC topology, member of the Series Resonant Converters (SRC) begins to be widely used in consumer applications such as LCD TVs or plasma display panels. In these applications, a high level of safety and reliability is required to avoid catastrophic failures once products are shipped and operated in the consumer field.

AND8311/D Understanding the LLC Structure in Resonant ...

In an LLC resonant converter, all semiconductor switches are soft-switching, or zero-voltage switching (ZVS), at turn-on for the primary MOSFETs and zero-current switching (ZCS) at both turn-on and turn-off for the rectifiers in the secondary; resulting in low electro-magnetic emissions levels (EMI). In addition, it can enable a high degree of integration in the magnetic parts, enabling the design of converters with higher efficiency and power density.
