So we talk about the risks of having an accident while driving, of contracting heart disease or cancer, or of being struck by lightning in a thunderstorm. These risks are considered by, for example, insurance companies using statistical data as the basis for assessment. In the context of engineering structures, 'risk' is often used in a more restrictive sense to express both the probability (likelihood) of an occurrence (such as the failure of the structure) and the degree of

consequences ...

What is meant by 'risk' in the context of engineering ...
