Comparative Study Of Food Consumption

The paper examines factors affecting the attitude towards and behavioural intention

regarding local food consumption and develops an extended model of local food consumption. An outcome of this new model is the inclusion of personal variables, which influence local food purchasing behaviour.

Drivers of local food consumption: a comparative study

...

A comparative study of the effect of food consumption on labour and birthoutcomes in Australia. Parsons M(1), Bidewell J, Griffiths R. Author information: (1)University of Western Sydney, School of Nursing, Family and Community Health, Parramatta, Australia. myraparsons@exemail.com.au. OBJECTIVE: to explore the effect of

volitional food consumption by women during labour and birth outcomes.

A comparative study of the effect of food consumption on ...

A comparative study conducted by Parsons et al. (2006) found that mothers who ate food only during early labour tended to experience a slightly longer labour and no increase in the incidence of medical intervention. Historical and contemporary opinion provide a less than adequate basis for much of the literature on this topic.
