Measurement System Analysis covers techniques for analyzing the variation within a measurement system, determining its suitability for use, and ways to improve measurement systems. The GR&R analysis techniques used in the MSA training program are in compliance with IAF 16949/AIAG methods. Once a measurement system is found to be acceptable, it is equally important to institute a formal system to manage the measurement system to ensure that it continues to be reliable and dependable.

AIAG - Core Tool Training - MSA - Measurement Systems Analysis

According to AIAG (2002), a general rule of thumb for measurement system acceptability is: Under 10 percent error is acceptabl. >10 percent to 30 percent error suggests that the system is acceptable depending on the importance of application, cost of measurement device, cost of repair, and other factors. Over 30 percent error is considered unacceptable, and you should improve the measurement system.
