"Conventionally, when constructing removable partial dentures (RPDs) for patients we rely on either a simple acrylic or metal framework such as cobalt-chrome to support the replacement teeth. However, metal denture frameworks have the potential for sensitivity, they can give a grey appearance and also there is the possibility of electrical galvanic action when metal is placed in

the mouth.

Innovation for removable partial dentures - The Probe

3.3.3 Removable Partial Dentures. Removable partial denture (RPDs) as the names suggests, is not fixed permanently in the patient's oral cavity and can be easily removed by the patient. As with FPDs, the RPD can also restore an incomplete dentition, but with broader indications because of not-so-strict prerequisites.

Acrylic partial dentures. The most popular material for partial dentures is resin plastic. This material can be dyed so that the color matches your gums. Acrylic dentures belong to the cheaper types. You can even have teeth added if you lose more. More acrylic is simply bonded to accommodate the addition. Acrylic partial dentures can last 5-8 ...

Partial dentures: types comparison & pictures | Authority ...

Dentures (false teeth) Dentures are removable false teeth made of acrylic (plastic), nylon or metal. They fit snugly over the gums to replace missing teeth and eliminate potential problems caused by gaps. Gaps left by missing teeth can cause problems with eating and speech, and teeth either side of the gap may grow into the space at an angle.

Dentures (false teeth) - NHS

With advances in technology, implants can also be used to support removable partial dentures, improving the fit while reducing the bulkiness of the appliance. Dentures inherently bring some challenges, especially to new wearers. Our goal is to minimize the everyday frustrations and keep you as comfortable as possible.
