Quantitative Analyses Of Behavior

Quantitative analysis of behavior is the application of mathematical models, conceptualized from a robust corpus of environment-behavior-consequence interactions in the experimental analysis of behavior, with the aim to describe and/or predict relations between a dependent variable and all possible levels of an independent variable. The parameters in the models hopefully have theoretical meaning beyond being used to fit models to data.

Quantitative analysis of behavior - Wikipedia

Quantitative Analysis of Behavior is the quantitative form of the experimental analysis of behavior. This has become the dominant scientific approach to behavior analysis. It represents behavioral research using quantitative models of behavior. The parameters in the models hopefully have theoretical meaning beyond being used to fit models to data.
