Derivatives have become an important component of financial markets. The derivative product set consists of forward contracts, futures contracts, swaps and options. A key issue is how prices for such derivatives are determined.

Derivatives - Edinburgh Business School

The derivatives market is the financial market for derivatives, financial instruments like futures contracts or options, which are derived from other forms of assets. The market can be divided into two, that for exchange-traded derivatives and that for over-the-counter derivatives. The legal nature of these products is very different, as well as the way they are traded, though many market participants are active in both. The derivatives market in Europe has a notional amount of €660 trillion.

Derivatives market - Wikipedia

Derivatives, such as futures or options, are financial contracts which derive their value from a spot price, which is called the "underlying". For example, wheat farmers may wish to enter into a contract to sell their harvest at a future date to eliminate the risk of a change in prices by that date.
