Plastic Lined Piping - FRP Systems

It is designed for use across the pharmaceutical and chemicals industries combining the corrosion performance and inertness of PTFE with a physical construction that produces an excellent gasket material. PTFE

and PFA lined piping systems do not usually require gaskets to maintain joint integrity.

Welcome to the CRP website - PTFE Lined Piping

Generally gaskets should not be used in a lined piping system. PTFE is in itself a perfect gasket and the addition of a gasket can create another leak path and a stress point for the PTFE. There are exceptions when joining PTFE to other equipment such as stainless steel, glass or graphite; or when frequently removing a lined item.
