Study Guide Answers: Blood and the Cardiovascular System

The circulatory system — or cardiovascular system — consists of the heart and the blood vessels. The heart, the main organ of the circulatory system, causes blood to flow. The heart's pumping action squeezes blood out of the heart, and the pressure it generates forces the blood through the blood vessels.

Figuring Out Cardiac Anatomy: Your Heart - dummies

The cardiovascular system, the body's pressurized blood re-circulation system is powered by a double pump, the heart. Cardiac output of the heart is regulated by intrinsic factors, the nervous system and the endocrine system. The human heart is composed of two filling and two pumping chambers, the atria and the ventricles.
