A node is the point of connection between two or more branches. A loop is any closed path in a circuit. A network with b

branches, n nodes, and l independent loops will satisfy the fundamental theorem of network topology: $b = l + n - 1$. Electrical Engineering – Electric Circuits Theory.

What is the Definition of Circuit Theory? An electrical circuit is a network consisting of a closed loop, giving a return path for the current through a switch. When the switch is actuated, the load activates and the current gets a path to complete the circuit from a high potential level to the opposite low potential level. 3.
