If you look at the schematic you will see that the 1K resistor, LED, and switch are all connected in series with the 9V battery. When you build the circuit, you will be able to turn the LED on and off with the switch. You can look up the color code for a 1K resistor using the graphical resistance calculator. Also, remember that the LED needs to be plugged in the right way (hint - the long leg goes to the positive side of the circuit).
