Illuminating Engineering Society - The Lighting Authority

The Illuminating Engineering Society of North America (IESNA) defines light as

“radiant energy that is capable of exciting the retina and producing a visual sensation.”

Light, therefore, cannot be separately described in terms of radiant energy or of visual sensation but is a combination of the two.

•Illumination The
 illumination of a

surface, or rather a
 point on a surface,
 depends on the density
 of the incident flux.
 This magnitude is
 called illumination.
 Illumination is ratio
 between the incident
 flux on a surface and
 the surface measured
 in m^2 (lumen/ m^2 =lux).

Illuminating

Engineering the branch of science and engineering concerned with the use of radiant energy containing visible wavelengths (light). It investigates principles and develops methods for generating and spatially redistributing light, measuring light characteristics, and converting light into

other forms of energy.

Illumination engineering is a field that spans many topics, including the development of sources, design of luminaires and lightpipes, measurement of lighting conditions, and machine vision.

Illumination Engineering - spiedigitallibrary.org

When the light falls upon any surface, the phenomenon is called the illumination. It is defined as the number of lumens, falling on the surface, per unit area. It is denoted by symbol E and is measured in lumen per

square meter or lux or meter-candle. If a flux of F lumen fall on a surface of area A , then the illumination of that surface is
