Second Language Acquisition

A Theoretical Introduction To Real World Applications *Bloomsbury Publishing*

This book is written in order to help undergraduate students and trainee teachers to reflect on certain topics and key issues related to second language acquisition. Despite the proliferation of books and introductory courses in second language acquisition, most of these books very often provide a very complex account of theoretical views in second language acquisition and sometimes fail to emphasise the crucial interplay between how people learn languages and what is the most effective way to teach languages. The overall purpose of this book is to provide an overview of second language acquisition research and theories by identifying the main key issues in this field and by highlighting the relevance of this research for classroom implications. The study of second language acquisition is a rich and varied enterprise, carried out by researchers, whose interests and training often lie in broader disciplines of linguistics, psychology, sociology, and education. Readers will be encouraged to critically reflect on the presented content through self-engaging thinking activities in the form of questions, matching activities, choices and conclusions about the implications of SLA theories to the real world applications.

Ethics in the Real World

82 Brief Essays on Things That Matter *Princeton University Press*

Provocative essays on real-world ethical questions from the world's most influential philosopher Peter Singer is often described as the world's most influential philosopher. He is also one of its most controversial. The author of important books such as Animal Liberation, Practical Ethics, Rethinking Life and Death, and The Life You Can Save, he helped launch the animal rights and effective altruism movements and contributed to the development of bioethics. Now, in Ethics in the Real World, Singer shows that he is also a master at dissecting important current events in a few hundred words. In this book of brief essays, he applies his controversial ways of thinking to issues like climate change, extreme poverty, animals, abortion, euthanasia, human genetic selection, sports doping, the sale of kidneys, the ethics of high-priced art, and ways of increasing happiness. Singer asks whether chimpanzees are people, smoking should be outlawed, or consensual sex between adult siblings should be decriminalized, and he reiterates his case against the idea that all human life is sacred, applying his arguments to some recent cases in the news. In addition, he explores, in an easily accessible form, some of the deepest philosophical questions, such as whether anything really

matters and what is the value of the pale blue dot that is our planet. The collection also includes some more personal reflections, like Singer's thoughts on one of his favorite activities, surfing, and an unusual suggestion for starting a family conversation over a holiday feast. Now with a new afterword by the author, this provocative and original book will challenge—and possibly change—your beliefs about many real-world ethical questions.

Craft in the Real World

Rethinking Fiction Writing and Workshopping *Catapult*

"An insightful guide for readers, writers, and instructors from all walks of life," this manifesto and

practical guide challenges current models of craft and the writing workshop by showing how they fail marginalized writers, and how cultural expectations inform storytelling (Kirkus Reviews). The traditional writing workshop was established with white male writers in mind; what we call craft is informed by their cultural values. In this bold and original examination of elements of writing--including plot, character, conflict, structure, and believability--and aspects of workshop--including the silenced writer and the imagined reader-- Matthew Saleses asks questions to invigorate these familiar concepts. He upends Western notions of how a story must progress. How can we rethink craft, and the teaching of it, to better reach writers with diverse backgrounds? How can we invite diverse storytelling traditions into literary spaces? Drawing from examples including *One Thousand and One Nights*, *Curious George*, Ursula K. Le Guin's *A Wizard of Earthsea*, and the Asian American classic *No-No Boy*, Saleses asks us to reimagine craft and the workshop. In the pages of exercises included here, teachers will find suggestions for building syllabi, grading, and introducing new methods to the classroom; students will find revision and editing guidance, as well as a new lens for reading their work. Saleses shows that we need to interrogate the lack of diversity at the core of published fiction: how we teach and write it. After all, as he reminds us, "When we write fiction, we write the world."

The Famished Road

A Novel *Open Road Media*

Winner of the Man Booker Prize: "Okri shares with García Márquez a vision of the world as one of infinite possibility. . . . A masterpiece" (The Boston Sunday Globe). Azaro is a spirit child, an abiku, existing, according to the African tradition, between life and death. Born into the human world, he must experience its joys and tragedies. His spirit companions come to him often, hounding him to leave his mortal world and join them in their idyllic one. Azaro foresees a trying life ahead, but he is born smiling. This is his story. When President Bill Clinton first went to Africa he quoted from The Famished Road, which has inspired literature, art, politics, and pop songs—and even been referenced in an episode of The Simpsons. A transformative story for all ages and all times, it means many things to many people. Few contemporary novels have aroused as much passion as this one. Indeed, twenty-five years after its breakout publication, the iconic story of Azaro's travels continues to mesmerize new generations. For readers of Things Fall Apart or One Hundred Years of Solitude, this Man Booker Prize-winning blend of fabulism and gritty realism by the Nigerian author of Astonishing the Gods and Dangerous Love is a "dazzling, hypnotic" journey through Africa that "weaves the humblest detail with the most extravagant flight of fancy to create an astonishing fictional tapestry" (San Francisco Chronicle). Already considered a classic of world literature, it is "a masterpiece if ever one existed" (The Boston Sunday Globe).

Sociology: A Very Short Introduction *Oxford University Press*

Drawing on studies of social class, crime and deviance, education, work in bureaucracies and changes in religious and political organizations, this Very Short Introduction explores the tension between the individual's place in society and society's role in shaping the individual, and demonstrates the value of sociology for understanding the modern world. In this new edition Steve Bruce discusses the continuing arguments for social egalitarianism, considering issues such as gay marriage, women in combat roles, and the 2010 Equality Act to debunk contemporary arguments against parity. As gender divisions are increasingly questioned he looks ahead to the likely consequences of this for society. Delving into the theory of sociology, Bruce also argues that the habit of dividing sociology into apparently competing 'sects' is misleading, and shows how a new understanding of the disciplinary background of many of the most famous theorists, which shows that much social theory is actually philosophy or literary theory, will prove useful to today's sociologists.
