Investigating the Relationship Between the Watson-Glaser Critical Thinking Appraisal and the NEO-PI-R

ABSTRACT: This study investigated the relationship between two selection assessments - the Watson-Glaser Critical Thinking Appraisal and the NEO-PI-R. Both assessments were used in the selection process of professionals at a large real estate organization. This study researched if personality traits and critical thinking skills are two distinct entities, and if each assessment assessed different domains relating to successful job performance and job-fit. The results indicated that the two assessments were measuring two distinct constructs (personality and critical thinking). Although there was not a significant correlation between the factor Openness to Experience and the total score on the WGCTA, the results indicated that the O5 facet, Ideas, is significantly correlated with total scores on the WGCTA. Future research will be required to further investigate the relationship between the Openness to Experience factor and the ability to think critically.

Validating the Watson Glaser Critical Thinking Appraisal on the American University of Beirut's Students

Critical thinking is highlighted as a main learning outcome which college education aims at. This study validated the Watson Glaser Critical Thinking Appraisal (WGCTA) on a sample of 273 students from the American University of Beirut's population. For that purpose, evidence for construct validation was gathered through investigating the differences in scores on the WGCTA between students from different genders (male- female), at different levels (freshman- sophomore/ 1 st year- junior/ 2 nd 4 th year and graduate) and from different streams (nursing- engineering- year-senior/ and business) using a series of ANOVA tests. Evidence for content and arts-sciences concurrent validity was also collected by means of computing the test's reliability coefficient as well as standard error of measurement and correlating some students' scores with their scores on the critical thinking component of the Collegiate Assessment of Academic Proficiency CAAP. Moreover, students in five chosen courses that emphasize critical thinking as a learning outcome were pre-post tested using the WGCTA. Results revealed no significant differences in scores on the WGCTA between male and female test takers or between students at different levels except for graduate students and the rest of the levels, in favor of the graduate students in the Business stream. Furthermore, results revealed significant differences for the senior students between Engineering and Sciences as well as Business students (in favor of Engineering students), and between Nursing and Business students (in favor of Nursing students). Finally, results showed no statistically significant changes in the mean scores of students who were pre and post tested in the five chosen courses except for nursing students whose mean score decreased. The test was also found to correlate positively with the Critical Thinking subtest of the CAAP ($r = 0.64$) The results were discussed and explained in terms of the effects of training and effective instructional strategies on growth of critical thinking but also of the nature of the construct itself. Recommendations for future research were proposed.

Perspectives in Controversy

Selected Essays from Contemporary Argumentation and Debate *IDEA*

Perspectives in Controversy brings together essays from the journal *Contemporary Argumentation and Debate* into a single volume. These essays explore current controversies in the theory of

competitive academic debate.

The NPEC Sourcebook on Assessment: Definitions and assessment methods for critical thinking, problem solving, and writing

Volume 1 of this sourcebook is a compendium of information about tests used to assess critical thinking, problem solving, and writing. It serves as a tool for people who want comparative data about the policy relevance of specific student outcomes measured in these areas. An interactive version of Volume 1 allows users to specify their areas of interest and create a customized search of assessment measures in the three domain areas. The tests described in Volume 1 are those that are designed to measure cognitive variables for traditional students. The compendium does not describe less traditional methods such as portfolios and competencies. In addition, the evaluations of the tests are based on the way test developers represent them in their materials and, in some cases, in information from third-part reviews. Volume 2 is a companion volume that provides eight case studies of institutions that have addressed related issues through the use of assessment methods in Volume 1. Volume 1 contains the following sections: (1) "General and Specific Issues in Selecting Assessments"; (2) "Critical Thinking and Problem Solving"; (3) "Templates--Critical Thinking and Problem Solving"; (4) "Writing"; (5) "Templates--Writing Commercially Developed Tests"; and (6) "Templates--Writing Locally Developed Tests." Volume 2 discusses the eight case studies and contains four appendixes providing details about the methodology. (Volume 1 contains 10 tables and 150 references.) (SLD)

How to Evaluate the Effectiveness of a School-Based Intervention

Evaluating the Impact of the Philosophy for Children Programme on Students' Skills *Emerald Group Publishing*

How to Evaluate the Effectiveness of a School-Based Intervention presents a multi-dimensional evaluation framework, which is not only based on measurable outcomes. Suggesting a cost-effective method of conducting a multi-dimensional evaluation, this book investigates how these skills can be defined and assessed effectively.

The NPEC sourcebook on assessment *DIANE Publishing*

Critical Thinking Appraisal

Handbook on Measurement, Assessment, and Evaluation in Higher Education *Routledge*

In this valuable resource, well-known scholars present a detailed understanding of contemporary theories and practices in the fields of measurement, assessment, and evaluation, with guidance on how to apply these ideas for the benefit of students and institutions. Bringing together terminology, analytical perspectives, and methodological advances, this second edition facilitates informed decision-making while connecting the latest thinking in these methodological areas with actual practice in higher education. This research handbook provides higher education administrators,

student affairs personnel, institutional researchers, and faculty with an integrated volume of theory, method, and application.

The Effect of the Engineering Design Process on the Critical Thinking Skills of High School Students

The purpose of the research reported here was to determine the impact learning the engineering design process (EDP) would have on the critical thinking skills of high school physics students. An EDP unit was conducted with 5 classes of high school physics students in grades 10-12 over 1 month. The EDP unit's curriculum allowed for the gradual release of responsibility as students became more familiar with the EDP and more consistent in using it. The six steps used in this EDP unit were Ask, Imagine, Plan, Create, Test, and Improve. The Watson-Glaser Critical Thinking Appraisal was given as a pre- and post-test to measure the growth in critical thinking skills. By measured standards, qualitative analysis and observation, students showed an increase in critical thinking skills and in confidence to use them.

Critical Thinking *MIT Press*

How the concept of critical thinking emerged, how it has been defined, and how critical thinking skills can be taught. Critical thinking is regularly cited as an essential twenty-first century skill, the key to success in school and work. Given our propensity to believe fake news, draw incorrect conclusions, and make decisions based on emotion rather than reason, it might even be said that critical thinking is vital to the survival of a democratic society. But what, exactly, is critical thinking? In this volume in the MIT Press Essential Knowledge series, Jonathan Haber explains how the concept of critical thinking emerged, how it has been defined, and how critical thinking skills can be taught and assessed. Haber describes the term's origins in such disciplines as philosophy, psychology, and science. He examines the components of critical thinking, including structured thinking, language skills, background knowledge, and information literacy, along with such necessary intellectual traits as intellectual humility, empathy, and open-mindedness. He discusses how research has defined critical thinking, how elements of critical thinking have been taught for centuries, and how educators can teach critical thinking skills now. Haber argues that the most important critical thinking issue today is that not enough people are doing enough of it. Fortunately, critical thinking can be taught, practiced, and evaluated. This book offers a guide for teachers, students, and aspiring critical thinkers everywhere, including advice for educational leaders and policy makers on how to make the teaching and learning of critical thinking an educational priority and practical reality.

American History and Teaching Critical Thinking

The effect of teaching critical thinking as part of a continuous progress packet in American history was studied at Cedar High School during the 1969-70 school year. An experimental group using the critical thinking packet was compared with a control group that used a continuous progress packet that taught only American history. The dependent variables for the study were the STEP (Sequential Test of Educational Progress), Social Studies portion, and the Watson-Glaser Critical Thinking Appraisal. No statistically significant differences were found between the groups in either American

history or critical thinking. Differences in critical thinking ability, though not significant statistically, seemed to indicate the desirability of further research in this area. It was also recommended, as a result of this study, that further research be conducted to develop and evaluate new methods of assessing student competence in seminar situations.

Adult Development: Models and methods in the study of adolescent and adult thought *Greenwood Publishing Group*

This volume brings together the works of distinguished authors in the field of postformal-operational cognitive, social, and perceptual development to examine the models and methodology used to investigate postformal thought. The contributors examine both Piagetian and nonstructural models of adult cognitive development, explore the measurement and comparison of cognitive development in adults, and assess the research and theory of adult reasoning in the moral domain. A concluding chapter investigates critical evaluations of postformal research.

Teaching in Nursing E-Book

A Guide for Faculty *Elsevier Health Sciences*

Teaching in Nursing, 4th Edition is the only nursing text to address all three components of education -- teaching, curriculum, and evaluation. Comprehensive guidelines help you meet the day-to-day challenges of teaching, including curriculum development, the diversity of student learning styles, and developing and using classroom tests. This edition has been updated with information on the latest trends in education including new information on the use of simulations to facilitate learning, the latest on competency-based and concept-focused curricula, developing learner-centered courses, and more. Edited by expert nursing educators Diane M. Billings and Judith A. Halstead, Teaching in Nursing is a past winner of the AJN Book of the Year award, and is an excellent resource for nurses preparing to take the Certified Nurse Educator (CNE) Exam. The only nursing resource to cover teaching, curriculum, and evaluation of students -- the three essential components of nursing education. Contributing authors are nationally recognized scholars in their fields of expertise. Models of teaching are used to demonstrate clinical teaching, teaching in interdisciplinary setting, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Teaching strategies promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations. Evidence-based teaching boxes explain how to practice and apply evidence-based teaching, with implications for faculty development, administration, and the institution. End-of-chapter summaries let you draw conclusions based on the chapter content. Open-ended application questions at the end of each chapter are ideal for faculty-guided discussion and online education. Up-to-date research looks ahead to the needs of the future.

Critical Thinking

An Annotated Bibliography *Scarecrow Press*

Providing a balance of reference to theoretical and practical information on critical thinking, this annotated bibliography of 930 selected items from 1980 through 1991 covers the fields of philosophy, psychology, and education. It is geared especially to teachers, administrators, and researchers in elementary, secondary, and higher education. Representing past and current trends in the concepts, research, and teaching of critical thinking, the eight chapters include literature references to the history of critical thinking, the Critical Thinking Movement, the wide range of views on the definition and concept of critical thinking, testing and evaluating, professional development and teacher training, research studies on learning transfer and effective teaching techniques, theory of teaching critical thinking, and instructional methods. Author and subject indexes.

Critical Thinking and Reasoning

Theory, Development, Instruction, and Assessment *BRILL*

Critical Thinking and Reasoning provides access to expert views on critical thinking. It covers (1) the theory of critical thinking, (2) the psychology of its development and learning, (3) examples of successful instruction, and (4) potent ways to assess it.
