Climatology

Climatology (from Greek κλίμα, klima, "place, zone"; and -λογία, -logia) or climate science is the scientific study of climate, scientifically defined as weather conditions averaged over a period of time.

Climatology - Wikipedia

Climatology, branch of the atmospheric sciences concerned with both the description of climate and the analysis of the causes of climatic differences and changes and their practical consequences.

Climatology | meteorology | Britannica

Climatology is the study of the atmosphere and weather patterns over time. This field of science focuses on recording and analyzing weather patterns throughout the world and understanding the atmospheric conditions that cause them. It is sometimes confused with meteorology, which is the study of weather and weather forecasting.

Climatology | National Geographic Society

the science that deals with the phenomena of climates or climatic conditions.

Climatology | Definition of Climatology at Dictionary.com

Climatology is the scientific study of climate. Climate is defined as weather patterns that have been averaged over a given period of time to obtain a consistent pattern of the expected atmospheric conditions. Weather is the atmospheric condition of a particular place over a short period of time, normally a day.

What is Climatology? - WorldAtlas

Physical climatology attempts to explain the properties of climates by the earth-sun geometry, atmospheric composition, ground characteristics, and the laws of physics. Synoptic climatology draws linkages between physical and dynamic aspects of the large-scale atmospheric circulation and surface weather tendencies at regional and local scales.

Climatology - an overview | ScienceDirect Topics

Climatology is the study of the myriad factors that influence weather, and the influence of weather on the environment. These include water, atmosphere, and geology. Climatology studies all of these things over the course of time, typically a 30 year cycle. What Does a Climatologist Do?

How to Become a Climatologist | EnvironmentalScience.org

Climatology, or sometimes known as climate science, is the study of the Earth's weather patterns and the systems that cause them. From the ocean oscillations to trade winds, pressure systems that drives temperature, airborne particles that influence local conditions and even the phases of the moon and Earth's wobble all affect the climate (1).

Climatology: The Science of Global Weather Systems over ...

Climatology is an interdisciplinary science of meteorology, geography, geology, oceanography, and physics. Climatology has undergone significant change in recent years. Due to the noticeable climate change, climatology today is much more than the study of climate elements and factors: it has become a decisive factor for the future of our planet.
