Low Vision. The concept of a comprehensive eye service involves the components of prevention of blindness, treatment of eye disease, eye health promotion and rehabilitation services for persons with incurable eye conditions. Despite major advancements in eye care, there are still a significant number of persons of all age group who can't have their sight fully restored.

Low Vision - IAPB

In a low vision assessment a practitioner will try to determine what a person with a visual impairment needs and wants to do. They will then assess the person's visual function which may include measurement of their Visual Acuity (distance and near), Contrast Sensitivity and Functional Visual Fields. Using this information the practitioner will determine if any low vision aids are available to help a person with low vision do the things they want.
