A common belief in the  
nuclear industry is that  
current maintenance  
practices manage  
aging degradation. As  
part of the NRC`s  
Nuclear Plant Aging  
Research Program, a  
number of aging  
studies were  
performed on safety-  
related systems and  
components which  
found that, even with  
current maintenance  
and monitoring  
practices in place, a  
large number of the  
reported failures are  
related to aging.
