In a 3-phase system the alternators or generators may be star connected or delta connected. Likewise 3-phase loads may be star connected or delta connected. Some of the advantages of star and delta cconnected systems are listed below. Star Connection: In a star connection, phase voltage $V_{ph} = V_L / (3)^{1/2}$. Since the induced emf in the primary winding of an alternator is directly proportional to the number of turns, a star connected alternator will require less number of turns than a delta ...
