Examination will be conducted for 100 marks with question

paper containing 10 full questions, each of 20 marks. Each full question can have a maximum of 4 sub questions. There will be 2 full questions from each module covering all the topics of the module. Students will have to answer 5 full questions, selecting one full question from each module. The total marks will be proportionally reduced to 60 marks as SEE marks is 60.

NETWORK THEORY(18EC32) - azdocuments.in

In mathematics, a Fourier series (/ˈfɔːr i eɪ, -i ər/) is a periodic function composed of harmonically related sinusoids, combined by a weighted summation. With appropriate weights,

one cycle (or period) of the summation can be made to approximate an arbitrary function in that interval (or the entire function if it too is periodic). As such, the summation is a synthesis of another function.

Normally, in the context of the Lebesgue integral, one would understand this to mean that $\widehat{f}e^{2\pi i \xi x} \in L^1$, which

is of course the same as $\widehat{f} \in L^1$, and then the statement becomes just the usual Fourier inversion theorem.
