Processing Instruction and Second Language Grammar Acquisition

Processing Instruction and Second Language Grammar Acquisition

As a solution to this problem, he argues that learners need to be taught how to

process input in order to better acquire the underlying grammar. This form of teaching he has termed 'processing instruction' (PI). It entails pushing learners to recognize the grammar in the input (ibid.: 764). There are three basic components to PI:

Processing instruction | ELT Journal | Oxford Academic

The results of the three experiments have demonstrated that Processing Instruction not only provides learners the direct or primary benefit of learning to process and produce the morphological form on which they received instruction, but also a secondary benefit in that they transferred that training to processing and producing another morphological form on which they had received no

instruction.

In IP model, principles are stated that describe how learners either miss grammatical markers in the input or how they get them wrong (VanPatten, 2002b). Based on this model, learners process input for meaning before form. Processing Instruction (PI), an explicit focus on form that is informed by the

model of IP, is a practical solution to IP model.
