However, there is limited empirical evidence on the relationship between nutritional status and cognitive achievement in middle childhood. STUDY DESIGN: As part of the South India Community Health Study (SICHS), we collected educational attainment and anthropometric data from 1,194 children in rural Vellore district of Tamil Nadu, India, and assessed their math and reading skills.

Nutritional status, cognitive achievement, and educational ...

There is a large literature that documents that Indian parents, especially in rural areas, prefer sons to daughters due to dowries and old-age security. This has important implications for the household’s fertility decisions because, in order to have the desired number of sons, parents continue to bear additional children in the family.
