Heat Energy. One of the most important types of energy on Earth is heat energy. A great deal of heat energy comes from the Sun's light hitting Earth. Other sources include geothermal energy, friction, and even living things. This unit helps students understand what heat energy is, how it is transferred, how it is measured, and how insulation can keep heat in or out.

Science A-Z Heat Energy Grades 3-4 Physical Science Unit

The book Heat Energy introduces several important concepts about heat energy. These include heat sources, temperature measurement, controlling heat through insulation, and the importance of heat energy for living things. The book also explains how heat is transferred, including convection, conduction, and radiation.
