The Songs of Trees

Stories from Nature's Great Connectors *Penguin*

WINNER OF THE 2018 JOHN BURROUGHS MEDAL FOR OUTSTANDING NATURAL HISTORY WRITING “Both a love song to trees, an exploration of their biology, and a wonderfully philosophical analysis of their role they play in human history and in modern culture.” —Science Friday The author of *Sounds Wild* and *Broken* and the Pulitzer Prize finalist *The Forest Unseen* visits with nature’s most magnificent networkers — trees David Haskell has won acclaim for eloquent writing and deep engagement with the natural world. Now, he brings his powers of observation to the biological networks that surround all species, including humans. Haskell repeatedly visits a dozen trees, exploring connections

with people, microbes, fungi, and other plants and animals. He takes us to trees in cities (from Manhattan to Jerusalem), forests (Amazonian, North American, and boreal) and areas on the front lines of environmental change (eroding coastlines, burned mountainsides, and war zones.) In each place he shows how human history, ecology, and well-being are intimately intertwined with the lives of trees. Scientific, lyrical, and contemplative, Haskell reveals the biological connections that underpin all life. In a world beset by barriers, he reminds us that life's substance and beauty emerge from relationship and interdependence.

Boys in the Trees

A Memoir *Flatiron Books*

Carly Simon's New York Times bestselling memoir, *Boys in the Trees*, reveals her remarkable life, beginning with her storied childhood as the third daughter of Richard L. Simon, the co-founder of publishing giant Simon & Schuster, her musical debut as half of The Simon Sisters performing folk songs with her sister Lucy in Greenwich Village, to a meteoric solo career that would result in 13 top 40 hits, including the #1 song "You're So Vain." She was the first artist in history to win a Grammy Award, an Academy Award and a Golden Globe Award, for her song "Let the River Run" from the movie *Working Girl*. The memoir recalls a

childhood enriched by music and culture, but also one shrouded in secrets that would eventually tear her family apart. Simon brilliantly captures moments of creative inspiration, the sparks of songs, and the stories behind writing "Anticipation" and "We Have No Secrets" among many others. Romantic entanglements with some of the most famous men of the day fueled her confessional lyrics, as well as the unraveling of her storybook marriage to James Taylor.

Teaching the Trees

Lessons from the Forest *University of Georgia Press*

In this collection of natural-history essays, biologist Joan Maloof embarks on a series of lively, fact-filled expeditions into forests of the eastern United States. Through Maloof's engaging, conversational style, each essay offers a lesson in stewardship as it explores the interwoven connections between a tree species and the animals and insects whose lives depend on it—and who, in turn, work to ensure the tree's survival. Never really at home in a laboratory, Maloof took to the woods early in her career. Her enthusiasm for firsthand observation in the wild spills over into her writing, whether the subject is the composition of forest air, the eagle's preference for nesting in loblolly pines, the growth rings of the bald cypress, or the gray squirrel's fondness for weevil-infested acorns. With a storyteller's instinct for intriguing particulars, Maloof expands our notions about what a tree "is" through her many asides—about the six species of leafhoppers who eat only sycamore leaves or the midges who live inside holly berries and somehow prevent them from turning red. As a

scientist, Maloof accepts that trees have a spiritual dimension that cannot be quantified. As an unrepentant tree hugger, she finds support in the scientific case for biodiversity. As an activist, she can't help but wonder how much time is left for our forests.

Song of Myself ...

Sounds Wild and Broken

Sonic Marvels, Evolution's Creativity, and the Crisis of Sensory Extinction *Penguin*

"[A] glorious guide to the miracle of life's sound." —The New York Times Book Review A lyrical exploration of the diverse sounds of our planet, the creative processes that produced these marvels, and the perils that sonic diversity now faces We live on a planet alive with song, music, and speech. David Haskell explores how these wonders came to be. In rain forests shimmering with insect sound and swamps pulsing with frog calls we learn about evolution's creative powers. From birds in the Rocky Mountains and on the streets of Paris, we discover how animals learn their songs and adapt to new environments. Below the waves, we hear our kinship to beings as different as snapping shrimp, toadfish, and whales. In the startlingly divergent sonic vibes of the animals of different continents, we experience the legacies of plate tectonics, the deep history of animal groups and their

movements around the world, and the quirks of aesthetic evolution. Starting with the origins of animal song and traversing the whole arc of Earth history, Haskell illuminates and celebrates the emergence of the varied sounds of our world. In mammoth ivory flutes from Paleolithic caves, violins in modern concert halls, and electronic music in earbuds, we learn that human music and language belong within this story of ecology and evolution. Yet we are also destroyers, now silencing or smothering many of the sounds of the living Earth. Haskell takes us to threatened forests, noise-filled oceans, and loud city streets, and shows that sonic crises are not mere losses of sensory ornament. Sound is a generative force, and so the erasure of sonic diversity makes the world less creative, just, and beautiful. The appreciation of the beauty and brokenness of sound is therefore an important guide in today's convulsions and crises of change and inequity. *Sounds Wild and Broken* is an invitation to listen, wonder, belong, and act.

The Man Who Planted Trees *Random House*

'A book for children from 8 to 80. I love the humanity of this story and how one man's efforts can change the future for so many. It's a real message of hope.' Michael Morpurgo Discover this

beloved masterpiece of nature writing that is a hymn to creation and to the power of the individual to do their bit to change the world for the better. In 1910, while hiking through the wild lavender in a wind-swept, desolate valley in Provence, a man comes across a shepherd called Elzéard Bouffier. Staying with him, he watches Elzéard sorting and then planting hundreds of acorns as he walks through the wilderness. Ten years later, after surviving the First World War, he visits the shepherd again and sees the young forest he has created spreading slowly over the valley. Elzéard's solitary, silent work continues and the narrator returns year after year to see the miracle he is gradually creating: a verdant, green landscape that is a testament to one man's creative instinct. A beautiful story of hope, survival and selflessness, *The Man Who Planted Trees* resonates as strongly with readers today as when it was first published.

The Forest Unseen

A Year's Watch in Nature *Penguin*

Finalist for the Pulitzer Prize and the PEN/E.O. Wilson Literary Science Writing Award "Injects much-needed vibrancy into the stuffy world of nature writing." —Outside, "The Outdoor Books That Shaped the Last Decade" The biologist and author of *Sounds Wild and Broken* combines elegant writing with scientific expertise to reveal the secret world hidden in a single square meter of old-growth forest In this wholly original book, biologist David Haskell uses a one-square-meter patch of old-growth Tennessee forest as a window onto the entire natural world. Visiting it almost daily for one year to trace nature's path through

the seasons, he brings the forest and its inhabitants to vivid life. Each of this book's short chapters begins with a simple observation: a salamander scuttling across the leaf litter; the first blossom of spring wildflowers. From these, Haskell spins a brilliant web of biology and ecology, explaining the science that binds together the tiniest microbes and the largest mammals and describing the ecosystems that have cycled for thousands-sometimes millions-of years. Each visit to the forest presents a nature story in miniature as Haskell elegantly teases out the intricate relationships that order the creatures and plants that call it home. Written with remarkable grace and empathy, *The Forest Unseen* is a grand tour of nature in all its profundity. Haskell is a perfect guide into the world that exists beneath our feet and beyond our backyards.

The Amulet of Cananea

Song of Carmelita

Carmelita Carreras's life over the past sixteen years has been a lie. A lie that was right in front of her green eyes the whole time. Huddled over her mother's deathbed, Carmelita leans close as she hears the story of how she came to be. A kitchen worker in the sprawling Mexican estate of a mining mogul, her mother, Edelmida, was brutally raped by an Irish immigrant supervisor. Furious and feeling helpless, Edelmida steals a bejeweled antique

cross, handed down since the days of Cortez, and plants it in the room of her rapist hoping for revenge. She gets her wish, and the man is run out of town as a thief. Edelmida marries a miner who Carmelita always came to think of as her father, but the true biological identity of her father is unclear. Carmelita sets out to find the truth about her father, the cross-missing for years and said to bring good fortune-and herself, sparking events that lead to the Mexican Revolution.

Memphis 1873 CreateSpace

Having survived the worst effects of the Civil War, the city of Memphis, battered but unbowed, finds itself facing a far more dangerous foe. It is invisible, lethal, and unstoppable: a plague of yellow fever. It is the story of JP Mahoney, 14-year-old farm boy who dreams of escape from tedious chores and farmlife routine. It is the story of a courageous young woman, Ginnie Moon, onetime Confederate spy, who now operates a boarding house for men who have survived the war. And it is the story of Kevin O'Boyle, an embittered riverfront laborer, who blames the world for his troubles, and finds the crippled city his perfect prey. Several characters in the novel are actual historical figures, most notably Ginnie Moon, Judge "Pappy" Hadden, and Cap'n Jim Lee. Their actions, and those of the other characters, are entirely fictional. The plague, one of several to hit the city in the years following the war, was all too real.
